

Digital Phenotype Mental Health Prediction - Hackathon Public Excerpt

Public-safe technical excerpt derived from the original project output.

Source: 2025 Yongin Severance Hospital Digital Healthcare Hackathon presentation

Concept

Use repeated digital phenotype and EMA observations as ordered time-series inputs for mental-health monitoring.

Role

Junha Won: team lead; machine-learning modeling; data preprocessing; project coordination and healthcare-service planning.

Prototype

The project connected predictive modeling to daily input, trend visualization, and personalized mental-health reporting.

Recognition

Grand Prize, Yongin Severance Hospital Digital Healthcare Hackathon.
